

Jean Pouch

Materials needed:

- Old pair of jeans (you only need the back pocket.)
- Ribbon, yarn, or roping.

Directions:

1. Cut out the back pocket of the jeans around the seams.
2. Cut from the inside of the jeans so you have the entire pocket, both front and back.
3. Decorate with paint, beads, trim or whatever else you have around.
4. Add ribbon, yarn, or roping for a shoulder strap by sewing or tying it to the sides of the pocket.
5. This makes a cute little pouch to carry special little items.
